

K-LOVE has been broadcasting in this area for many years using FM translators. This is necessary since it is a low cost alternative in this area which historically is low or short on its pledge funding. K-LOVE provides crucial God centered, family listening in an area (Vancouver / Portland / & the Pac NW) which is well below par for the nation in church attendance. This service provides national music broadcasting as well as local info and announcements. This programming also services the out-lying rural areas which would otherwise have limited station options. Finally the use of the translator system gives a cohesive network for travelers and transportation workers to feel a part of the home network even while away. Thanks for your consideration
